

Breakdown Service Sweden is an independent solution company which was founded in 2011.

With a network of 500+ partners, we are capable to assist you with any challenge, anywhere in Sweden

Breakdown Service Sweden offers you a wide range of solutions for any of your technical challenges while your vehicles travel through Sweden.

# 24/7 nationwide Roadside Assistance

*Technical problems always occur at the most inconvenient moments! A stranded truck at roadside causes a lot of costs. Except for the costs of the solution itself, your staff occupied finding a solution, delay of goods, missing connections and it possibly affects your (JIT) performance.*

*Using Breakdown Service Sweden, help is always nearby. Our RSA partners prioritize roadside solutions to get your equipment on the move again. Only in last option, towing to a workshop is proposed as a solution.*

*All the crews we use, have adequate equipped vehicles to be able to solve the most common reasons for standstill and staff are experienced and trained for working at road side.*
